Is email access included with my hosting plan?

Helpdesk Staff - 2020-09-01 - Comentarios (0) - SSD Shared Hosting

Unlike other providers like Wix or SquareSpace, we do include full-featured email access, including iOS push notifications, IMAP synchronization for all devices, SSL-secured mail servers and webmail access with all our plans. Email usage is included in your general account storage quota. You can also create as many email accounts (you@yourdomain.com) as you desire. We also offer very strong anti-spam and anti-malware protection.
