Where is my data hosted?

Helpdesk Staff - 2020-09-01 - Comments (0) - General Questions

We offer you the choice of seven different datacenters from around the world, depending on the type of plan chosen. When you purchase a polur.net hosting plan, you'll be able to select a datacenter in the United States, the United Kingdom, Canada, Germany, or the Netherlands (location availability varies by product type). You can learn about the benefits of hosting in Canada on our Canadian Hosting page.
